South played in 4H, a contract he fully expected to make when the bidding was over. However, dummy did not exactly fill South with glee because of the wasted honours in spades. Worse was the opening lead of the queen of clubs. South played low on the first club and on the second club too. East took the third round with the ace and returned a spade to South's ace. Despite the points, the game is in trouble. How can South make 4H from here?

The Westhand: S-108763 H-J D-964 C-QJ109 The Easthand: S-954 H-K93 D-10532 C-A62

You have to do some imagining here to come up with a layout that will work. If you lead the accofhearts you can not make 4 Heven if the king drops. If West has the singleton king, East will get a trick with his J93 of hearts. And if East has a singleton king. West will get a trick with the J93 of hearts. And it East has a singleton king. West will get a trick with the J93 of hearts. The ace can not succeed. But the thinking is right. Keep looking at ways to play the heart suit and imagine a layout, if possible, where you can hold your heart losers to none. There is a way. It is against the odds but there is a combination where you can succeed Go to dummy and lead the queen of hearts. Your hope is that West has a sin-

gleton jack. This is your only chance. If this layout exists, East can cover but you will see West's jack and will know to go to dummy to finesse against East's nine. Be careful. The only way to dummy is in diamonds. Be careful that you play

the eight to the jack or play the queen to the king, keeping a second diamond entry in the event that your wish comes true and you need to go to dummy again for a second heart finesse.

We must take advice from Indian farmers who by using just 62000 tons of pesticides are able to get agricultural output worth of \$534 billion USD.

> In European Union we use 5 times more pesticides (3.50 lakh tons) and yet we get agricultural output worth only \$278 billion USD - just half of the India's agricultural output.

It's because we are fast learners. We blend modern science with traditional wisdom as advised by our government, scientists, and pesticide industry experts.

# **Open Appeal to European Commission**

## "Do not preach what you don't practice".

The European Parliament in its Resolution No. 2021/2177 (INI) dated 5<sup>th</sup> July 2022 made unsupported and unsavoury remarks raising doubts about the safety of India's agricultural and food products. The resolution observed that "the EU should support India in helping its farmers reduce the use of pesticides."

The implied message is that Indian farmers are using more pesticides than EU farmers. This is utter falsehood.

Indian farmers use 62,000 tons of pesticides for an annual agricultural production of \$532 bn. Whereas the farmers of the EU use 3,49,993 tons and produces agricultural output worth only \$278 bn. In other words, the EU farmers use 5 times more pesticides than India, yet their agricultural production is just half of India's.

Ideally, the European Parliament must pass a resolution seeking the help of Indian farmers to train the EU farmers on the art of judicious application of pesticides for enhancing the agricultural output.

The EU introduced Directive 2009/128/EC in October 2009 which established a framework to achieve sustainable use of pesticides and promote non-chemical alternatives to pesticides.

Recent data released by European Commission shows this Directive has been thoroughly rejected by the EU farmers who continue to increase their reliance on chemical pesticides to manage complex pest problems.

According to the European Commission, the pesticide consumption in EU increased 34% from 2,60,665 tons in 2012 to 3,49,993 tons in 2021.

The EU policy makers are simply sleepwalking with no knowledge of ground realities. We urge them to wake up.
